TEXSYS electronics were tested under harsh conditions. Product- and process reliability is the main task and topic for the safe high end product. Performed well in extended reliability tests.

TEXSYS BT Stereo Music and Headset Ski Helmet (Type 13A)

Bluetooth 2.1 compatible headset and hands-free operation for making/receiving phone calls. Upgrade such a communication helmet by simply connecting it to your MP3 player via Bluetooth and listen to your favourite songs. The auto switch system stops the music when your phone is ringing: The perfect combination of fun and function while doing snow sports!

Application Areas

- Wintersports: Skiing, Scating ...
- Horseback Riding
- Inline Scating
- Mountain Biking
- Safety Devices
